Sample Budget

Most applications will require you to present a budget showing the projected expense and revenue associated with your project. It is a good rule of thumb to have applications pending that will total 4 times your needed revenue. Many foundations will not meet your full request. A budget is best presented in a spreadsheet format.

\$2500 profit will be restricted for use in presenting future performing arts events

In general, revenue should equal expense but, in the case of this initiative, the goal will be for presenters to show some profit to be held in reserve for the next performing arts event for the community.
